

The screenshot shows a web-based map interface. On the left, there is a 'Layers' panel with a list of map layers, each with a checkbox and a plus icon. Below it is a 'Legend' panel. The main map area shows a geographic region with various colored overlays (blue for water, orange for floodplains) and street names. Three blue callout boxes with arrows point to specific UI elements: one points to the 'LAYERS' header in the left panel, another points to a 'Basemaps' dropdown menu in the top right corner, and a third points to the 'NG911' layer checkbox in the left panel.

Click on LAYERS. To expand list.

Use drop down box to view Satellite Map

Check box add addresses on map.

1. **Select desired view (Satellite)**
2. **Zoom in, scroll, and drag with mouse to navigate map.**
3. **Select desired Layers (NG911, Parcels, etc.)**
